EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John A. Castellano on May 19, 2003.

The application has been amended as follows: Please cancel claims 25-34.

Allowable Subject Matter

2. Claims 1-24 are allowed.
3. The following is an examiner's statement of reasons for allowance.

Kitami et al. clearly teaches the construction of a piezoelectric transformer with a primary portion and a secondary portion, capable of generating and transforming piezoelectric vibrations in accordance with an AC Voltage fed to one portion, the secondary portion is provided with a plurality of inner electrodes.

Schafft clearly teaches the construction of a piezoelectric transformer with a primary annular portion and a secondary annular portion, capable of generating and transforming piezoelectric vibrations in accordance with an AC Voltage fed to one portion for the purpose of providing an improved high voltage transformation device and to increase the power handling capability of a ceramic ring transformer.

Lemonon et al. teach the use of a conical thermoformed protuberance in the construction of a polymeric piezoelectric transducer for the purpose of detecting and generating elastic compression waves, for infrared radiation, and for storing electrical energy.

The prior art of record, taken alone or in combination, fails to teach the construction of a piezoelectric transformer and a method of operating said transformer as described on independent claims 1 and 24, wherein the piezoelectric portions are annular in shape, polarized perpendicular to the peripheral direction, and adapted to operate at a resonance frequency of a dimension of a cross-section of the annular body perpendicular to the peripheral direction.

Dependent claims 2-23 are considered allowable by their dependence on allowed independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: See PTO-892, which was send with the replaced Office Action.
